WORK EXPERIENCE

Software Engineering Intern

Glosix

2026

Lahore, Pakistan

- Developed full-stack web features using **React**, **Node.js**, **Express**, and **Tailwind CSS**, connecting frontend views to relational **SQL** databases.
- Built and integrated RESTful API endpoints to handle data flows and user interactions efficiently.
- Implemented AI workflows with **Python** and **LangChain**, focusing on dynamic prompt handling and structured LLM responses.

PROJECTS

Autonomous AI Travel Agent

Python, LangChain, Streamlit, LLMs

2026

- Developed an intelligent travel planning application using **LangChain** to orchestrate dynamic multi-step itinerary generation based on user constraints[cite: 2]. • Integrated Large Language Models (LLMs) to automatically generate structured travel schedules, activity recommendations, and budget plans[cite: 2].
- Built a responsive user interface using **Streamlit** to enable real-time prompt inputs and interactive itinerary views[cite: 2].
